SUGGESTIONS FOR A MODEL ORCHARD

Trees and Plants of medium grade for Orchard below will be furnished, pruned, ready to plant and delivered to you at price of $50.00 cash. Spring 1932 only.

The best plan for planting an acre 210x210 in a Home Orchard for this section is as follows:

12 Paper Shell Pecan, plant 60x60 feet	$15.00
33 Early to Late Peach, plant 20x20 feet	9.90
10 Early to Late Pear, plant 60x60 feet	5.00
22 Early to Late Plum, plant 20x20 feet	11.00
22 Early to Late Plum-Cherry, plant 20x20	11.00
6 Fig, plant 20x20	2.10
12 Grape Vines, Assorted, plant 20x20 feet	2.40
50 Blackberries, plant 3 feet in row	1.50
50 Dewberries, plant 3 feet in row	1.50
Total	$59.40

This can be used as a unit and doubled as many times as required. Apples are not as successful as other fruits, but farmers living near the River and other favorable portions of this State can grow apples successfully. The same may be said of strawberries.

The above proposed planting is furnished by The John S. Kerr Nursery Company of Sherman, Texas. We will be glad to furnish the farmers with detailed information as to preparation of the soil, selection of orchard site, best varieties to plant and proper pruning and planting methods.

Our 55 years experience shows that most of the successful farmers have a good orchard and garden.
